

# Pulse broadening and compression at 515 nm in a multi-pass cell

*Tuesday, 30 August 2022 12:00 (2 hours)*

Frequency-doubled 220 fs laser pulses at 515 nm are spectrally broadened and compressed in a multipass cell down to 38 fs using solid and gas as nonlinear media. The efficiency of this process is 90 %. This is the first demonstration of multipass spectral broadening and compression in green.

**Primary authors:** HARITON, Victor (Helmut Schmidt University, Hamburg, Germany); FRITSCH, Kilian (Helmut Schmidt University, Hamburg, Germany); PRONIN, Oleg (Helmut Schmidt University, Hamburg, Germany)

**Presenter:** HARITON, Victor (Helmut Schmidt University, Hamburg, Germany)

**Session Classification:** Lunch and Poster Session 1
