

# Mamyshev regenerator for ultrashort light pulse shaping

*Thursday, 1 September 2022 12:00 (2 hours)*

We present a Mamyshev regenerator setup with electrically controlled acousto-optic switch. This setup allows the injection of a long, poor quality pulse through one of the switch inputs. After a few tens of regeneration cycles occur the input pulse is shaped into high quality ultrashort light pulse.

**Primary authors:** LIAUGMINAS, Gustas (Center for Physical Sciences and Technology, Vilnius, Lithuania); REGELSKIS, Ke, stutis (Center for Physical Sciences and Technology, Vilnius, Lithuania); DUBOSAS, Giedrius (Center for Physical Sciences and Technology, Vilnius, Lithuania); ŽELUDEVICĖ, Julijanas (Center for Physical Sciences and Technology, Vilnius, Lithuania)

**Presenter:** LIAUGMINAS, Gustas (Center for Physical Sciences and Technology, Vilnius, Lithuania)

**Session Classification:** Lunch and Poster Session 2
